to fit your  
print shop.**

THE

**X-SERIES**

Print on virtually any media! Large flatbed printers designed for signage and graphics print at high speeds, but are limited by substrate thickness. Small format printers designed for specialty items print at slower speeds and are limited by substrate length and width. The Xanté family of X-Series Printers do BOTH. It's the best of both worlds. Print single, large signage, 12-up signage, manufacturing products, specialty items, industrial objects, and more.
