Print on anything with the new UV Transfer Media from

XANTÉ

XANTÉ

Introducing the **newest advancement in UV printing technology, UV Unlimited.** For those looking to expand their offerings and increase their return, UV Unlimited is the perfect addition to a Xanté X-Series printer.

Print directly onto adhesive material and stick it to virtually any surface including glass, metal, cups, containers, plastics, sporting goods, industrial equipment, and more. Since the UV Unlimited system utilizes UV-cured ink, the results are durable and can be applied to objects of any shape.

PRINT ON ALMOST ANYTHING!

- ✓ Wood
- ✓ Vinyl
- ✓ Plastics
- ✓ Rubber
- ✓ Metal
- ✓ Bottles
- ✓ 3D Objects
- ✓ Paper
- ✓ Glass
- ✓ Containers
- ✓ Industrial Equipment
- ✓ Office Equipment
- ✓ Kitchen Equipment
- ✓ Mugs & Cups
- ✓ Laptops & PCs

Apply ink to a layer of clear Transfer Media.

The Transfer Media is fed through the UV Unlmited Laminator

Adhesive is now bonded to the ink and can adhere to almost anything

It's that simple!

**THE RIGHT UV PRINTING SOLUTION TO SUIT YOUR NEEDS**

THE RIGHT AMOUNT OF WHITE INK

Xante's powerful workflow software, iQueue, lets you choose exactly how much or how little white you want to apply to your job, and it puts it in exactly the right places.

Choose from No White, White Under Entire Job, White Under Print Area, or White Under Ink, AND choose to apply up to 9 layers of white ink. For UV Unlimited, it's recommended to use 2 layers of white underneath the artwork for optimal adhesion to the UV Unlimited Transfer Media.

iQueue
